

Press Release

PE INTERNATIONAL - First "Accredited Partner for the Carbon Disclosure Project"

CDP software accreditation strengthens PE's leadership position.

Leinfelden-Echterdingen, 28.10.2009. PE INTERNATIONAL recently became the first Accredited Partner for the Carbon Disclosure Project (CDP). After undergoing a due diligence process PE's SoFi Software was tested by the independent GHG Management Institute, resulting in the certification of PE INTERNATIONAL's SoFi software to conduct corporate carbon footprints and reports for the CDP reporting process.

CDP is an independent not-for-profit organization holding the largest database of primary corporate climate change information in the world. It acts on behalf of 475 institutional investors, handling \$55 trillion in assets under management and some 60 purchasing organizations such as Walmart, PepsiCo and Cadbury.

A study by Groom Energy recently confirmed PE as a market leader in Enterprise Carbon Accounting. Paul Baier, VP of Consulting at Groom Energy, stated "Today PE INTERNATIONAL has the most solutions for Enterprise Carbon Accounting implemented globally. The CDP software accreditation strengthens their leadership position."

"We are excited about this partnership. It expresses our confirmed commitment to assist corporations in analyzing, reporting and managing greenhouse gas emissions. We just see huge potential in this partnership to contribute even more to industries and economies shifting toward better practices in sustainability" so Michael Betz, Managing Director of PE INTERNATIONAL.
